Dear Mr Hsieh,

I am sorry to say so, but the listings that Simon has given me on the sales data are not so good. I only checked a few months randomly. (january 2009 and november 2010) and they have too many expensive mistakes.

For example:

- line 31 in january 2009: the 8% commision on the hasco sales of 30.855,16 should result in € 2.468,41 You calculated € 1.542,76 which is € 925,65 too low

- line 59 in november 2010: the 3% commission for alhorn needs to be calculated on € 55.000,00 not € 5.500,00.

- november 2010: the sales to Tyco G1 is forgotten

These are very big mistakes in only 2 months that I checked.

Since the data seems incomplete and with many errors I will not check further and at this point it also makes no sense to check with clients yet.

As mentioned on october 12 my invoices belong to the letter from october 4 that my lawyer has sent to your lawyer, see also the attachment.

It is a little inconvient that you did not have this letter at that time because I think it is very clear and your lawyer should be able to explain that to you.

Because of this inconvenience I think it is better to consider the letter from Simon named reply-to-vos-20121011.pdf as not written

and wait for the reply of your lawyer, also because I totally disagree with the content but it makes no sense for me to explain since Simon always disagrees..

regards
eltjo
